6/1/2019

Dear Member,

In a continuing effort to provide safe and reliable electric service to you and your neighbors, Hendricks Power Cooperative will be trimming trees in your immediate area within the next couple of months. In addition to the line that feeds directly into your home, our contractor, Williams Tree Service, will be trimming trees and vegetation around the lines and power poles that are located on your road and/or behind your home.

At no cost to you, we will be utilizing the natural/directional pruning method. This method of trimming complies with all arboricultural regulations and is the better method for the health of the tree. Directional pruning causes trees to assume different shapes depending on the location of the power lines. Reference the picture below for an understanding of results from the directional pruning method.

Williams Tree Service will notify you with an approximate timeframe of their workplan through a notice on your door. If you have any questions or unique situations concerning this project, please feel free to contact me at (317) 718-7630 or ikemp@hendrickspower.com

IF THERE ARE NO TREES AND/OR VEGETATION ON YOUR PROPERTY NEAR THE POWER LINES OR POWER POLES, PLEASE DISREGARD THIS NOTICE.

Respectfully,

A handwritten signature in black ink that reads "Israel E. Kemp".

Israel E. Kemp
Vegetation Management Supervisor, Hendricks Power Cooperative
